

GRAPE EXTRACTS moisturiser Cream 50ml

Brand: Fleur De Mer

Price From: \$88.00

Short Description

Protects, nourishes, hydrates and moisturises

Description

GRAPE EXTRACTS CREAM (all skin types)

APPEARANCE AND PROPERTIES

This day cream has a soft silky texture which provides care for devitalised and stressed skins damaged by external aggressions especially urban pollution and showing premature skin ageing. Derived from an original formula, this cream contains an extract of Vine Leaf, a powerful anti-oxidant extracted from Wine and a strong regenerating active ingredient. It provides a firming and visible anti-wrinkle action as well as a light tensing effect. Argireline smoothes features thanks to a botox-like effect. Rich in nourishing ingredients (Shea Butter, Grape Seed Oil) and hydrating agents (Glycerine, Sodium Hyaluronate), it permits the skin to rebuild its protective film and to maintain the level of water in the superficial layers of the epidermis. A UVA/UVB sun filter added to a mineral screen ensures efficient protection against harmful UV rays. The skin becomes younger, firmer and better protected.

KEY INGREDIENTS:

Titrami of red wine: Extracted from Vine Leaf, Titrami rich in flavonoids is combined with Optivegetol Vin to prevent skin damage due to free radicals.

Matrixyl: Peptides accelerating cell renewal and skin regeneration. Functions very much like Vit C.

Argireline: Hexapeptide which disorganises the release of neurotransmitters responsible for muscles 'contraction'. Like with Botox facial tensions are relaxed and the formation of lines and wrinkles reduced.

Grape Seed Oil: An oil with a soft and gentle texture. It is rich in essential fatty acids (linoleic acid) working as an anti-oxidant thanks to its high content of Vitamin E. Very nourishing.

Optivegetol Vin: Extracted from Wine, this ingredient efficiently neutralises harmful free radicals and reduces oxidative stress responsible for premature skin ageing.

Shea Butter: This agent nourishes and repairs the hydro-lipidic film thanks to its richness in Vit F. It also has properties which fight against the loss of firmness.

Glycerine: Glycerine has humectant properties and maintains the level of water in the superficial layers of the epidermis.

UVA/UVB Sun Filters: Protection against harmful UV rays.

Treated Zinc Oxide: This is a mineral sun filter that perfectly protects the skin from UV rays without irritation.

APPLICATION:

Apply each morning on a perfectly cleansed face and neck.
