

Sodium Hyaluronate Serum 30ml

Brand: Fleur De Mer
Call for Price: 0408 259 336

Short Description

This is a brilliant and quick acting plumping & hydrating

Description

Hyaluronate Acid is a natural component of our skin. It is essential for maintaining the correct water balance for keeping our skin hydrated and plumped.

Unfortunately as we age Hyaluronate Acid decreases in volume in our skin and consequently the ability to attract and maintain moisture. The skin then begins to dry and become unattractive and wrinkles and sagging become noticeable.

This Sodium Hyaluronate Serum is a unique and easily absorbed form of Hyaluronate Acid. Because Hyaluronate Acid is already in our skin this serum can provide more volume to rehydrate skin and fill in lines as well as plump up sagging skin.

An added bonus is fuller lips and smoother skin around your mouth and eyes for a natural looking smile.
