

Environmental Defence 50ml

Brand: Fleur De Mer

Price From: \$82.00

Short Description

Combats damage to face from pollution, sun, free radicals, etc. Very powerful anti-oxidant

Description

ENVIRONMENTAL DEFENCE

Essential anti-oxidant skin protection against environmental pollution

APPEARANCE AND PROPERTIES

A light white easily absorbed milky concentrate. Ozone applied to the skin from machines in Beauty Schools and Salons is effective and valuable. But ozone in the atmosphere is unstable and tends to break up leaving very damaging and dangerous by-products for our skin. This is exacerbated by free radical toxins, pollution, the sun's burning rays and much more which are all definite causes of premature skin ageing and skin deterioration. Wherever we live or work our skin has to face daily these damaging and dangerous attacks. But be assured that you can now recommend steps towards proper care and safeguards for your customer's skin from the harmful effects of the environment with Environmental Defence.

Environmental Defence also feeds skin with natural and essential nutrients that are light and fresh for the continuing beauty and hydration of the skin. It is therefore essential for

the undisturbed progress of all physiological functions of our skin.

KEY INGREDIENTS

Vitamin A (Retinol & Beta -carotene) & Vitamin C (Sodium Ascorbyl Phosphate) and Vitamin E (Tocopherol): These could be the most vital anti-oxidants to diminish free radical damage to the skin caused by chemical pollution. This is because they are the natural vitamins occurring in our skin. Not chemically or laboratory synthesised. Vitamin C actually achieves a whole lot more on the skin.

Scientists report that when topically applied it can inhibit UVA and UVB radiation induced damage. Individual vitamins are more effective when combined with other vitamins than when applied separately. These must be supplied topically since the body cannot synthesise them nor can oral ingestion attain the same high levels. A deficiency leads not only to internal problems but also to characteristic damage to skin and hair.

Vitamin B3 (Calcium D-Pantothenate and Inositol): For its beneficial effect on the skin.

Marine Extracts: Over 50 natural vitamins, minerals and proteins from the sea all of which are found in healthy skin. Therefore aids in creating a defence mechanism against premature ageing and promoting health & beauty.

Special Water in Oil Emulsion: These specially formulated emulsions blend with the lipids in the skin thereby carrying the active ingredients deeper in and allowing them to stay there.

APPLICATION

Use every day -first thing in the morning and last thing at night after Mist of Roses.

Smooth gently over thoroughly cleansed and dried face and neck until fully absorbed. Follow with your usual skin care. A Sunblock SPF 30+ application is essential during the day if spending any time outside
