

Daily Mini Peel Powder 80g

Brand: Fleur De Mer

Price: \$79.00

Short Description

Instant result. Gentle enough to use every day. Look and feel wonderful

Description

DAILY MINI PEEL POWDER

All skin types

APPEARANCE AND PROPERTIES

A white, light smooth powder with no fragrance and no granules. The main consideration for peeling the skin on a daily basis is that the active ingredients must be extremely gentle. It is also important that it rinses off easily and thoroughly. This unique and effective smooth powder activates with water in the palms of your hands to create a smooth creamy paste. When this is gently massaged into the face the salicylic acid gently starts to peel away the top layer of dead skin cells in the Stratum Corneum without any roughness. Healthier and lovelier skin is instantly noticed and felt.

KEY INGREDIENTS

Salicylic Acid: outstanding exfoliant and absolutely smooth and non-granular. It also has the unique ability to penetrate oil in both skin and follicles and peel away the built up skin cells inside. AHAs are water soluble and can't do this. It is therefore the best choice when blackheads and blemishes are present. It is also found in Fleur De Mer's "Acne Relief".

Vitamin C: helps to lighten dark spots and blemishes while brightening the skin.

Oatmeal: for much softer, smoother skin.

Cucumber: for an instantly refreshing feel.

Green Tea: powerful anti-oxidant for healthy skin.

Remaining Ingredients: ensure optimum pH and a very thorough rinse off.

This is why it can and should be used everyday. Skin just keeps on improving ... day after day after day.

INSTRUCTIONS

Use preferably first thing every morning after cleansing. Sprinkle about 1 teaspoonful into the palms of very wet hands. Rub together to create a soft, creamy paste. Now apply this paste all over your face avoiding your eye area, raw or broken skin and massage gently for ½ to 1 minute. Rinse with warm water and gently dry. SEE, FEEL AND ENJOY YOUR FRESH NEW LOOK ... TODAY AND EVERYDAY

Not recommended if you are using medically prescribed exfoliating (peeling).

High level sun protection daily is strongly recommended.
