

Rich Nourishing Eye Cream 30ml

Brand: Fleur De Mer

Price From: \$57.00

Short Description

For eye area beginning to show fine lines, dryness and wrinkles

Description

Eye Care

Rich Nourishing Eye Cream

Visible long lasting results

When the eye area is showing signs of dryness or when fine lines are becoming more obvious this richer more nourishing eye cream is necessary. Despite the richer texture it is very soft, spreads beautifully and leaves no trace on the skin at all.

What it contains and how it works

Apricot & Macadamia Oils: Soften and nourish skin

Wheat Germ Oil: Powerful anti-oxidant to help reduce premature ageing of the skin around the eyes. Also very nourishing.

Hyaluronic Acid: Very hydrating while also preventing moisture loss from the skin.

Decyl Oleate: Closely resembles the sebum (oil) of the skin. Without this oil the skin dries and lines would become more obvious.

How to get the best results from Fleur De Mer Rich Nourishing Eye Cream...

Cleanse face and eye area thoroughly, rinse and dry. Gently apply to eye area until completely absorbed. Use morning and night. Avoid getting cream into eyes

Everyday apply Fleur De Mer SPF 50+ Sunscreens which come in Clear or Colour Foundation Creams - specifically designed and made for Australia's harsh exposure to the sun!
