STAR INGREDIENTS

Phytoplankton Diatom: Rich in fatty acids which activate the renewal of oxidised protein after extensive UV exposure.

Fresh Phytoplankton Micro Algae : Stimulates the synthesis of the most important humectant in our bodies ... Hyaluronic Acid (+66%). Plumps and reduces the appearance of lines and wrinkles (-20% in 1 month).

Alaria Esculenta: Marine plant. Rich in Omega 3, 6 and 9 for cellular energy and firmness. Increases Hyaluronic Acid, Collagen and Elastin synthesis revealing a more radiant skin.

Gulf Stream Seawater: Fresh and icy cold for complete remineralising and better

hydration and oxygenation.

Marine Blue Thistle: The symbol of the preserved coastline of Brittany. Used as a medicinal plant in ancient times it is highly concentrated in anti oxidant polyphenols, polyol and amino acids that allow the plant to respond better to environmental stress. In winter it lives on accumulated reserves in its roots. That's how they ensure enhanced skin protection against enviromental stress.
